Sinai Health continues to undertake a number of initiatives to fully comply with the requirements of the Procurement Directive. Sinai Health is committed to the principles of the Procurement Directive (delivery of quality patient care and other services, value for money, accountability, transparency and process standardization) and has endeavoured to fully comply.

For certain complex but essential goods and services, the time required to prepare and conduct an effective procurement extended beyond the term of the existing contract. In these circumstances, contract extensions were used to ensure continuity of service until such time as a fulsome procurement process can be completed.

These procurements are consistent with the key principles of the Procurement Directive, and are not considered significant exceptions to compliance.
